EDITORIAL .

1 9 6 6

As U.F.O.P.I.A. begins the new year, we look forward to a great deal of interesting work, and it appears that if beginnings are any indication we shall have indeed a very busy and active one indeed.

The Year began with various sightings being reported all over Adelaide and has continued to this month February, flowing in from many sources. some of a more than usual character whilst others were " bright lights" which acted unusually strange enough to be incapable of being fitted into the " known" pattern. Some of these are reported in the sightings pages at the rear of the edition.

Probably the thing which gave us the best encouragement and zest for a fresh start for the year was the fact that the National Station SAN along your Editor at short notice and asked would it be possible to give an hour interview on that station next morning at 9.a.m. on a session called " Today" which touches on all interesting occurrences, this being brought about by the Queensland sightings and the " nests"(see later write up) .

The interview was remarkably well conducted and was a credit to the station in the very open minded way it was treated, and without the least smear of any kind being placed on the subject .

The results were indeed gratifying , for it brought about many callers and letters who asked for more information and also 3 requests for lectures to be given to clubs etc. this all within the space of four days. and we are expecting more.

We have predicted already that this year will prove a very surprising one. and one indeed which will have startling results. on the terrestrial scale, and also on the international political scale. economics will be very much effected and that in the earlier part of the year . Our advice to you if you have stocks and bonds is to watch out and don't be caught. if you must invest do so in essential goods etc only. Strictly keep away from "luxury" productions. It might not hurt to even stock up with a good supply of unperishable food s There will be a shortage of food materials. and the larder that is full will be a good investment . If you buy now especially while their prices are normal. Meanwhile keep your eye on your health. BE SURE WHAT TYPE OF WATER YOU ARE DRINKING. ALREADY SOME COMMUNITIES ARE FEELING THE DEHYDRALISING EFFECTS OF FLOURIDES IN THEIR WATER . AND MORE IS TO FOLLOW. KEEP AS MUCH AS POSSIBLE TO NATURAL FOODS. PRESERVE YOUR OWN . YOU KNOW WHAT GOES IN TO PRESERVE THAT WAY.

" THOSE SAUCER NESTS ?."

In our last Edition we briefly re-ated about the sightings in Queensland in which observers claimed they had seen saucers and afterwards found deep impressions among the reedbeds on their propertys.

As this came out we we had to get the edition out. then very later due to the Editors sickness. we had to leave any further reprotos or information of these events till this issue and because we have had many enquiries from at home as well as overseas concerning this case we will give as many detailasas possible. Some of which will be amrepeat from last edition to bring things up to date.

Firstly on Jan 19th a banana grower of Tully Queens. reported having found in a swamp on his property , a circular clearing of " pressed down " reeds " as though a large object had r sted there. He also added that he had seen a"vapor like saucer-shaped object take off from that very spot last Wednesday"

A seconda and third sighting sighting was observed first by a cane faremer and a school teacher when they were walking around Horsos Lagoon on another cane-farmers property who clammered into the 5 ft. deep swamp to retrriieve some of the grass some of which was floating " unusually so " as though " they were sucked up by something "

These samples were subsequently sent to the Queensland University for observations. and here is were all the boloney starts. We cannot say who is to blame for this for we feel that the investigator who sent them must have been inclined to conclude that all suacers leave radiation effects around them and thus wanted to establish this fact with the reeds sent to the University.

Anyone who has had any long experience with the evidence now manifold of saucer landings etc. knows that whether radiation is recorded or NOT. would not prove the presencor otherwise of a saucer. as it has never been established that any such radiation has ALWAYS been evidence of the presence of a sacuer. although in a few cases it may have been present. but it has not been actual proof of the saucers presence. one way or the other. Hence the Universitys fidning that there was little radiation recorded. and which was used as evidence to prove that there was NO SAUCERS up there. is indeed a futile claim

The pointbwhich all seemed to have overlooked or lit l mention was made of. was the feat that the people on whose property thses " nests " had been left HAD SEEN OBJECT SIMILAR TO A SAUCER : this being aprt from the fact of the depressions on the swampy reeds.

Let us look at some of the evidence of the " nests".

From phots printed in the press of all states. it is quite apparent that some large object had pressed dwn onto the reeds leaving a surrounding area quite unaffected. The explanation given by officials later that they were caused by the large floods which had recently been in that area . is indeed a "watery" one. in fact the floods were so extensive we would ask how is that these effects were only seen and caused and in such a large formation . in just the area where saucers had been seen by the property owners. We ask, Did any other folk report such " nests" in that flooded area. of that size and condition. ???

"THOSE SAUCER NESTS?" 2

Quest 2. "Why were these deeply impressed reeds caused by a wet flood, all DRY whilst the surrounding ones ALL GREEN around the perimeter of the nests. ??

Lets here what one of the observers and the local policeman have to say.

Mr George Tully told the the local police his experience on Wednesday night. He said that at 9 o'clock on Wednesday morning he was driving a tractor from Tully. When approaching Mr Albert Pennesis farm, he heard a loud hissing noise, louder than the noise of the tractor.

At first he thought the tractor was giving trouble. But, as the hissing noise grew still louder, he realised it was something else.

Gazing around, he said, he saw a circular object above some trees about 40 yds. away. The object seemed to dip a little then took off at a very high speed and soon disappeared.

As he continued to drive the tractor, he saw the big depression in the tall green grass in the swamp land, which contained about five feet of water with long green grass and bull rushes growing through it. The grass had been pushed flat in an area about 30 ft. by 20 ft.

On Thursday, the officer in charge of Tully police (Sergeant 1st Class A.V. M MOYLAN.) went to the area and inspected the depression in the swamp grass. He said the grass in the depression was still lying flat and had browned off although it did not appear to have been burned. Mr. Pedley said that the previous day when he saw the huge mark. the grass was quite green.

Sgt. Moylan said there was no sign of any marks having been made by cattle or other animals. There were no tracks leading in or out of the depression, and the grass had been flattened smoothly.

"I do not believe in flying saucers--- not yet," he said. "I have to see one first". "But the peculiar marks in the swamp grass seems quite inexplicable. It occurred to me it may possibly have been made by a helicopter, but to the best of my knowledge there has been no such aircraft in this area".

Sgt. Moylan said that the smaller type helicopters commonly put down when their fuel supply was nearly exhausted and refuelled themselves from drums carried on the craft.

But against the helicopter theory, he said, was the fact the depressions in the swampgrass was close proximity to trees, and a helicopter pilot could have found a much better landing spot in a clear area about 100 or 200 yards further out.

On Thursday night, Mr. Pedley told a "Townsville Bulletin" reporter that when he first saw the object he did not know what he was looking at.

He said "he could not believe his eyes at first" but after seeing its shape and size, the speed with which it flew away and the impressions made in the grass afterwards, he took it to be a "flying saucer".

Mr. Pedley who is 28 said that the object looked like two saucers joined together with a small cabin at its top and another small projection underneath. He said it was about 25 ft. long and 9 ft. deep, and was greyish in colour. The object had hovered about 30 ft. from the ground for at least a minute before rising straight up and flying towards the south-west.

He said "Had anyone asked me five days ago if I believed in Flying saucers I'd have laughed and thought they were nuts,"

" THOSE SAUCER NESTS?" 3

Ina further interview he said " I know now I have seen a space ship "
 " No one will ever convince me that I amigned this thing "

He added these further deyaills to those already given . " I saw no portholes or antennae, and there was no sign of life either in or about the ship".

He decided not to say anything because he thought no one would believe his story.
 " But on my way home to Tully that night I met Alber Pennisis , who owns the property where I saw the saucer.

He believed me straight away, and said he had dramed he would have a saucer land on his property, and added that" at about 5.30 a.m. on Wednesday his dog suddenly went mad and bounded off towards the lagoon ."

Mr Pedley said he drove to a service station and told three people there what he had seen.

"Then the fun started . They were convinced I was crackers and told me so. "
 Mr Pedley took them to the spot and pointed out the strange circle and decided to call the police.

It was next day the other two men who were walking aorund the are found the other two nests making 3 in all.

One however appeared to be some days old, but the other, only a few feet away seemed reasonably fresh .

They were about 25 yards from the first one, but hidden by some dense scrub. The fresher one is only eight feet across, and the reeds were flattened in an anticlockwise fashion. In the first disc however theyran in a clockwise direction . One other mystery has turned up... A patch of couch grass about four feet square and about three feet from the perimeter of the first disc, has been clipped at water level .

Well folks this is the evidence to date. We are leaving the rest of this oage open for further news if it turns up otherwise will use it for someother news.

.....

A SPECIAL NOTE FROM YOUR EDITOR.

It is with regret I have to inform all our readers that following close on the sickness in hospital which I reported in our last edition of PANORAMA On March 6th whilst returning from Woomera, some 350 miles from Adelaide on the very bad road between there and Pt Augusta. I was involved in a bad car accident. which resulted in my having broken ribs and very bad bruises etc. I was taken some further 40 miles to the Pt. Augusta Hospital were I was hospitalised for this accident and after some 10 days returned to Adelaide for further treatment , and although at present up and about at March 28th. am still suffering much pain and shock. Hence any further delay which has been caused by this additional misfortune must be fully understood as beyond my control and although as I stated in my last Editorial I did hope to catch up this additional blow to my work has made it for some time at least to bring your copies of the magazine up to date as per issues for 1966. By now we should be preparing Vol5 No2 and have hardly completed Nol. I KNOW I DO NOT HAVE TO APPEAL TO YOU ALL TO BEAR WITH ME IN THIS MATTER BUT RATHER ASK FOR YOUR PRAYERS AND ESPECIALLY FOR GUIDANCE FOR THIS YEAR AND ITS VERY VITAL WORK AHEAD

GOD BLESS YOU ALL AND ESPECIALLY THOSE WHO HAVE SO KINDLY SENT ALONG MANY KINDLY THOUGHTS AND CARDS. THANK YOU

WE STILL ARE "M . " WITH GOD ALL THINGS ARE POSSIBLE ".

THE EDITOR. FRED STONE.

" DID SAUCERS CAUSE THE NEW YORK BLACK OUT ?."

We frankly admit that we have found this question a very debatable one indeed. because we have had sent to us much conflicting evidence for both sides of the argument, , but our desire is to be openly frank and honest with our readers and even if we tend to favor one side or the other at least leave it to them to judge for themselves which they feel convinces them most .

In any case we possibly may never be able to prove either side fully, and especially as we are so far away from the actual scenes of the incident, are entirely dependant upon such bits and pieces of facts and data as we can receive, are at the best only therefor judging by circumstantial evidence.

The following is from Bob Gribble's report on the matter .

U.F.O did not cause the the massive blackout or power failure of most of the North East United States on Nov . 9th --- Or did it?...

The official report attributed the blackout to a broken relay at Sir Adam Beck power plant No.2 at Queenston. Ontario Canada. There has been considerable UFO activity near the Beck plant recently. Residents of Erie, Ontario. Canada. observed a large UFO overhead about the time of the blackout.

According to witnesses, the object had appeared for at least a week. almost every night, turning the black night sky as bright as day . This, of course, is no proof that the flying objects were the cause of the power failure.

There was considerable UFO activity also in the area around the Syracuse, New York on the night of Nov. 9th. Deputy Civil Aviation Commissioner Rober Walsh was piloting a plane about 1500 feet over Syracuse when the lights went out. When he got back on the ground, Walsh said, ' a strange thing happened. I was sitting on the ground near the runway with others when we saw a sudden ball of fire south of us. It appeared to be about 1000 feet in the air and 50 feet in diameter . All I could think of was a mushroom effect'. About 10 minutes later, Walsh said the group saw another ball of fire answering the same description .

Two men in an airplane above South Bay, New York reported seeing a huge fireball shortly after the lights went of at 5.22 p.m. Weldon Ross, part time flight instructor with the Syracuse Flying School and his student, James Brookings , reported seeing a ' ball of orange-reddish fire which flared bigger than a house fire'. Ross said he and Brookings were about over Three Rivers ' when the lights went out. We were over the high line (electric power line) which runs from Clay, New York, to Niagara Falls, New York. when we saw the fire flash. It looked like a barn fire-- a barn full of hay and lasted for perhaps 10 seconds.

I know I was over the power lines. I Couldn't see them but I knew where they were' Ross said he knows the area where he saw the fireball very well. He said the location of the sighting is north of Hancock Field. Ross has been teaching flying on weekends and nights for 15 years. Another man, Tom Dorse, Town of Manlius, New York , reported seeing a ' ball of fire' sometime within an hour of the time of the lights went out. He described it as looking "Like the sun setting ', only in this case it was setting in the east . He said he saw the object ' between an opening in draperies' but had no intention of saying anything about it until he read of Commissioner Walsh's experience. Dorse also reported a woman neighbor said she saw a bright object described as 'yellow but which stood on end, was oval rather than round, stood up and down rather than crosswise.' Mrs. John Clary of Onondaga, N.Y. sighted a ' mushroom ball

" DID SAUCERS CAUSE THE N.Y. BLACK OUT ?" (2)

of fire.' Leon Carpenter of Fayetteville, N.Y. said he also saw a ' ball of fire' from his shower room . A Camillus, N.Y. housewife and three of her children reported they saw a 'huge- dome-shaped fireball in the sky just before the lights went out' Mrs. Dewey Boshers said a mushroom -type ball of light appeared in the south-eastern sky that stayed for a least five minutes. Mrs. Boshers said the strange light rose over the moon. As she and her children watched, the fireball began to move forward. As it did so, the house lights dimmed . Then Mrs. Boshers reported , it moved backward and disappeared in a flash, simultaneous with the loss of electric light . Another Camillus woman Mrs Everett B. Jones said she saw a huge ball of fire hanging over Camillus Plaza on Route 5 shortly after the lights went out. She said she saw a huge orange ball of fire sink below East Hill just outside Camillus. Several unimpeachable witnesses in scattered areas of Philadelphia. Penn. reported seeing a ' curious cloud, shaped like an upended coin with a handle,' in an otherwise cloudless sky at almost the exact moment the power failure occurred. One of the witnesses Walter Voelker, a research engineer, said, : ' The most curious aspect was that by the time my wife and I saw the ' cloud' and could stop the car in traffic for a better look, it had shifted to the other side of the sky. We saw it in three different locations. Later we learned of others who had had similar experiences in sighting it.' Mr and Mrs, John A. Dorr of Somerville, N.J. reported that just after the blackout occurred. they were looking out their kitchen window when they noticed a large light in the black sky. At first it was stationary, then it moved vertically and horizontally, making an almost complete square. It then moved at great speed to the north east.

FCC Commissioner Chairman J.C. Scindler has said that the electric power black - out may never be fully explained , and that there is no guarantee it could not happen again . How about that .

Here ends the B. Gribble N.I.C.A.P. REPORT

The above is the case for the saucers causing the blackout. and it cannot be denied in the light of so many witnesses that there WAS some bright object like a " FIREBALL" around that night . now lets hear the case for the defence as it appears to your Editor.

THE OTHER SIDE OF THE STORY .

First let us examine the evidence above... It must be clearly noted that at no time did any witness say it was an UFO. ALL witnesses testified they had seen a bright flaming FIREBALL, now any one who has much to do with saucers will know there is a vast difference between the fireballs and the actual "saucers" We concede the fireball may have come from a saucer but no evidence given above seems to indicate the presence of such. and when all the witnesses are put together they seem to indicate that the object seen by them all COULD HAVE BEEN THE ONE AND THE SAME especially as some indicated that it moved from place to place.

Let us for a moment concede it MAY have been from a saucer. What proof have the witnesses given that it actually CAUSED the blackout. It was present. YES. But who can say that it may not have been there OBSERVING what took place IF it was from a saucer ? is it not possible that it may have been on a reconnaissance mission , in the light of the lack of proof that it actually CAUSED the black out have we not as much right to think that maybe it was there to register back what 'they the brothers KNEW was going to happen, and were their to protect the interests of those whom they are watching over ".

"DID SAUCERS CAUSE THE N.Y. BLACKOUT?" (1)

In the light of the evidence to follow it is possible that such was the case. Further since when have the saucers had to resort to "fireballs" to put out of action any manmade devices. It is well known that they have technical knowledge far superceding ours, and if a LASAR Ray can do so much they have much more delicate and finer instruments to accomplish such an act if they so desired. To use a "fireball" for such is in my imagination an insult to their skill and know how. Instruments inside their crafts could do that without such fireworks displays. they don't go in for show-poney business.

Now let us hear some evidence not known generally about that night .

Your Editor has relayed to him a weekly news service of things of vital interest which happen in the USA most of which does not get a reporting in the press generally because it would be against the present government policy to let the public know things are not going as well as they plan they would.

From this news service he learned that on that night. certain trunk line telephonists were connecting calls from one side of N.Y to other places and on more than one occassion before the actual connection was put over and the operator disconnected herself. the significant words " when the lights go off " was heard in the beginning of the conversation. At the time no thought was given to such as no telephonist worrys about conversations. of a few words heard under such circumstances. but after the lights DID go out when comparing with others, it did occur that those calls we from people who KNEW the lights were going to GO OFF and were alerting some others about it with instructions.

Further how as it thata few minutes before the blackout. in a number of vital traffic areas. negroes were jamming their cars together and blosking the way so that when the lights blew. a congestion had Strated and was prepared and ready for the event to Cause chaos in a situation that was by no means pleasant HOW DID THEY KNOW WHEN TO DO THIS SO MUCH TO THE SEC ND.?? it not feasible tha the whole thing was a well planned thing by organised groups who are out to disrupt the whole of the American people at present. On top of this there were well organised riots of the same raceial people in certain are.s. RIGHT ON THE MINUTE THE LIGHTS WENT OUT THEY WENT TO WORK .

Now we have no case more than the other side , that of circumstantial evidence but your Editor feels that this whole thing was well planned and that of those rulers and powers of darkness who are ruling the affairs of today. The negroes are only tools, as much as are the reds in a much more serious way . IT IS ALL PART of a GREAT PLAN for the take over of our civilisation .

Now Did not Rheinholdt Schidt tell us years ago that he was shown under water devices which were laid around the USA to trigger off things to disrupt and cause disaster when those manipulating them wanted it to happen .

Surely we are not that naive as to believe that if Russia wanted to use some special secret device and try it out she would not hesitate to do so. WE ourself have RAYS which can travel thousands of miles and cause havoc. and if Russia wanted to use something similar who is there to stop her TRYING .

The " fireball" could well have been the results of such a ray and its resultant energy force, but WHY BLAME IT ON THE SAUCERS WHEN NO SAUCERS WERE NEAR?.

Much more evidence could be given to prove the whole thing was well organised and known by ceratin gr ups well BEFORE it took place. The USA Govt. certainly won't admit it. but they can be assured that this will not be the last they will have unless they get rid of the rulers in high places which are running their country at present. and the puppets who have become yes men to them . and IT WONT BE THE SAUCERS WHO WILL BE DOING IT. INFACT THINGS MAY GET SO HOT THEY MAY BE CALLED TO SEEK THE ASSISTANCE OF THESE BROTHERS FROM SPACE .

"WORLD'S GREAT SCIENTIFIC AUTHORITY CLAIMS SIGHTING WAS A RELIABLE FLYING SAUCER SIGHTING."

PIX (AUST) March 12. 1966

Mr Charles Gibbs-Smith is recognised as one of the world's greatest authorities on aviation. He considers the photograph produced by the girls in the account is of "impeccable authority" and shows no object or phenomena at present known to man.

With the eyes of the world trained on the "flying saucer nests" near Tully, in North Queensland, another mystery sighting passed almost unnoticed in Ireland.

And this time the mysterious object was photographed.

The world is sharply divided into believers or non-believers in flying saucers (the non believers are still in the overwhelming majority) so the photograph will add further fuel for argument.

It was taken by a Danish girl, Lisbet Mortensen, one Sunday afternoon near Cappoquin, in County Waterford, Ireland.

Miss Mortensen was a passenger in a car driven by Miss Jacqueline Wingfield. Miss Wingfield first noticed the U.F.O.

She stopped the car and both girls got out to watch the object. It was between 3.15. and 3.30 On a fine afternoon with a clear blue sky. The object flew steadily across the sky, low down, and making no sound at all.

The object was curved and elongated, solid looking and light in colour. Behind it, and seeming to be attached to it rather than emanating from it, was a "plume" of flame-like brightness. The plume left no smoke trail or other wake.

Miss Wingfield tried to get a photograph of the object but found her camera was not loaded. She called to Miss Mortensen to get her camera from the car which the Danish girl did, and managed to get one shot before the UFO disappeared in the distance.

This camera, and Agfa Flick 2, was a simple type and easy to operate, otherwise there might not have been time to operate it.

Miss Wingfield took the unprocessed film to a colleague of hers, Mr Charles Gibbs-Smith, a Companion of the Royal Aeronautical Society and a Keeper at the Victoria and Albert Museum and the Wellington Museum in London.

He is also one of the world's greatest authorities on aviation and an author of many books on the subject.

Mr. Gibbs-Smith was most impressed. He said, "Here is a sighting by reliable witnesses, accompanied by a photograph of impeccable authenticity, the first of which- after seeing many examples- I can vouch for from start to finish"

Mr. Gibbs-Smith said he was in doubt about the best method of having the film processed to get the best results from it if it was found to have anything significant on the negative.

"But, by good fortune," he said, "my friend Mr Percy Hennell, a photographer of world repute, came into my office shortly after and generously offered to have the film processed and printed in his private studio under his own eye."

" SCIENTIFIC AUTHORITY CLAIMS UFO SIGHTING RELIABLE " (2)

"With this offer I knew the film was in the hands of a man not only of the highest technical ability, but also of the highest integrity . "

The photographer Mr Percy Hennell then gave his account .

I received the roll sealed of the Agfa Isopan F film from Miss Wingfield. This film was processed under my supervision and in my presence by my assistant in the recommended developer, with a normal development time.

" The frame in question was one in a series of holiday landscape snapshots.

" I examined the negative and feel certain that it would be impossible, even with forethought, to fake such a negative, quite apart from the conditions of the photography in this case precluding the possibility .

" A series of enlargements of increasing density was made on contrast paper. I naturally left all the prints free of retouching.

" In the lightest prints, it is obvious from the movement in the foreground image that the camera has been swung during photography in order to keep the object in the view-finder. The type of camera would suggest the exposure could not have been less than 1/50th of a second and was more probably in the region of 1/25th .

" I am well aware of the ways in which a superficially similar effect might be produced under laboratory conditions, after development , but not only was the film developed in a sealed tank , it was not examined until development and fixation were completed.

" The negative , as it exists now, could be examined by any photographic chemist , who could only confirm that no after-treatment was attempted on the negative.

Miss Wingfield was somewhat puzzled when she saw the prints . Her recollection of the UFO was more elongated shape and of a shorter plume.

Mr. Gibbs-Smith said the shorter shape of the object could be accounted for by the altered perspective of the machine as it was going away.

The longer plume in the photograph could possibly have been caused by the camera registering more of it than did the human eye.

He said the object's brightness , its trailing plume and its rapid horizontal movement across the sky ruled out such suggested possibilities as a balloon , an aircraft, a satellite, or a meteorite.

Mr Gibbs-Smith himself does not see any alternative explanation except that the object is interplanetary-- or what is more commonly called a " flying saucer " .

" If, after only 60 years of flying , we can now orbit the earth at 18,000 miles an hour , is it not possible, " he asks " That other civilisations much older than our 70,000 years could travel between stars with trouble?

And few deny that there may be many advanced civilisations in space. "

Lsibet Mortensen's photograph stands as evidence. But evidence of what?.

Mr. Gibbs-Smith and others find the scientists' technical explanations unconvincing-- and more complicated than their own view, that it may really be a THING from outer space.

Reports of things in the sky have been going on for nearly 100 years, even in Australia. In recent years they have been pouring in from and made by responsible people. These include the Air Force pilots, six staff men from the Dept. of Civil Aviation's Canberra control tower, a prominent astronomer at

" SCIENTIFIC AUTHORITY CLAIMS UFO SIGHTING RELIABLE " . (3)

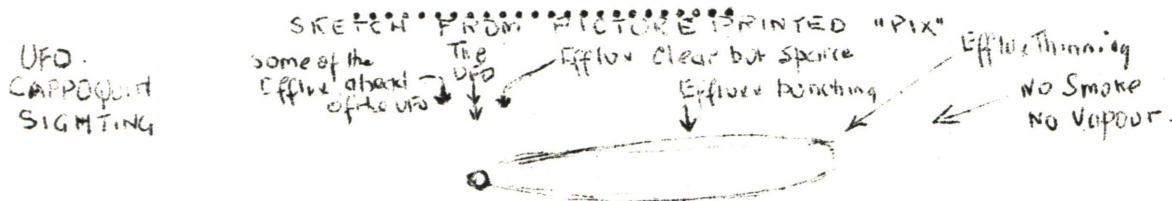

the Mount Stromlo Observatory, a priest , ,e,bers of the police and a publican.

Perhaps the most significant of these was the Canberra sighting on July 15, 1965 It caused world wide comment .

Eight men who watch the sky for a living saw a mysterious glowing object hovering over Parliament House. Six of them were Department of Civil Aviation staff members and the two were T.A.A. pilots. The staff men of the Canberra control tower observed the UFO for 40 minutes, five to ten miles north-east of the airport and 5,000 ft high.

The two T.A.A. pilots , who had just taken off from the airport, were asked by radio if they could see the object. They replied they had it under observation and so had the passengers.

This , and many other authoritative sightings , are lending weight to the pro-flying saucer school, but the majority of the public remains unconvinced.

DID SAUCERS CAUSE N.Y. BLACKOUT.?. CONTINUED FROM PAGE 7.

One thing is sure the USA Govt. will not admit ~~WHAT~~ caused it . no matter what explanation is given. for if you say UFO. They say they don't exist and thus would be admitting to something they won't talk about .

A well planned thing to cause chaos?. No that too makes them fools incapable of controlling the forces which they have now set in motion one against the other. An attempt by Russia to try out their espionage dupes and also put into effect some of the secret devices they have boasted about. Remember some of the boasts of Khrushchev. On No' No' No'. This must not be admitted for are they not trying to pull the wool over their peoples eyes and make out they are now on friendly terms ~~WHO ARE THEY FOOLING.?~~ Certainly NOT ALL the good American citizens.

Now let us return to a statement made by one of the high ups in the actual blackout situation . and recall his words. and we reprint them in large letters to impress you more there deep implications.

F.C.C. CMSNR. CHAIRMAN JOSEPH.C. SWINDLER HAS SAID THAT THE ELECTRIC POWER BLACKOUT MAY NEVER BE FULLY EXPLAINED AND THAT THERE IS NO GUARANTEE IT COULD NOT HAPPEN AGAIN ."

Note those last lines, there is no guarantee it could not happen again.

Is this not a most frank admission that he and others in charge of affairs are well aware of what CAUSED the blackout. and this admittance that it could happen again is one which speaks of an inability to control the forces ~~WHATEVER THEY WERE TO REPEAT THE PERFORMANCE. HE SHOULD KNOW.~~

CONTINUED ON PAGE 11

MORE SAUCER NESTS ..

"THE SYDNEY SUN" Friday February 25th 1966

FIND BY TWO BOYS

SYDNEY SAUCER NESTS.

A "flying saucer nest" has been found in a swamp a mile east of Bankstown Airport.

It is almost identical to the five found in the swamp land near Tully in North Queensland last month.

The Bankstown nest, an almost symmetrical 20ft-diameter circle of flattened reeds, was found last Monday week by two Yagoona schoolboys.

Robert Dennis and Larry Stewart discovered the nest as they took a short cut through the swamp on their way home from Cundell Park High School.

It looked as though it had been flattened by a huge disc.

"PUNGENT SMELL"

Tall reeds were flattened into the MUD as if by some tremendous force and all were in a perfect clockwise position.

Robert Dennis, of Cantrell St. Yagoona, said he and his friend Larry Stewart had first noticed the nest last Monday week.

"When we first found the nest we noticed a peculiar pungent chemical smell, which seemed to hang in the air," he said.

"It was not like the usual swamp smell and when we got back to the nest the next day the smell was gone.

"The other thing we noticed was the way in which all the reeds were flattened in a perfectly circular pattern and manner.

"The reeds were also bent at the base and not broken.

"We have noticed ourselves that if you try to flatten the reeds they break off at the stem.

"The nest seems to have been forced by some huge downdraft of air moving in a circular motion."

LIGHT IN THE SKY.

A Punchbowl woman said today she and her neighbours had seen mysterious white lights each night near the Bankstown Airport.

Mrs Maureen Clunne, of Lumeah Ave. Punchbowl, said she had observed the lights for an hour.

A girl who telephoned "The Sun" this morning said she had seen a very bright light over Bankstown last night.

The girl who refused to give her name, said the lights remained motionless in the sky for some time.

"The boy who lives next door, Reg Lawson told me he has watched the lights for about a week," said Mrs. Clunne.

"He said he has seen as many as three lights in the western sky over Bankstown."

.....

The above account is accompanied by a press picture which like those in ~~OTHER~~ Queensland. do not appear to be made by water movement or any known form of machine.

We would like to add that since the Queensland incidents. a T.V. show in which

MORE SAUCER NESTS CONT (2)

an astronomer who was interviewd claimed that the " nests" were caused by nothing else than Helicopters which MAY have been dustcropping nearby .

We would like our readers to read back on the accounts given in the previous pages of these cases in Queensland. and note these facts.

The Police sergeant said there were NO helicopters in the area and HE SHOULD KNOW especially if they were merely crop dusting ones. and not in secret missions. if any kind.

Further his evidence stated that there were places near at hand which would have made much better landing places for such a craft if such had been there.

The actual nests themselves did not appear to have been caused by helicopters.

One government official claims it was caused by floodwaters. now an astronomer says it was helicopters. although we would like to know what qualifies an astronomer to identify helicopters markings. we thought he would be more likely to blame our dear old girl friend Venus. or has it shifted to big old Jupiter .

"ADVERTISER" Adelaide March 1st 1966

Bordertown. Feb 28th .

A shocked Bordertown youth returned home last night and told his parents he had seen a flying saucer on the road.

The youth, Robert Kirby, 18, of Cannawigara road, said he saw the object about five miles north of Keith on the Duke's Highway at 10.p.m. yesterday.

He said that the flying saucer looked like a saucer inverted on top of a another .

It was hovering several feet above the road, and disappeared into the night at great speed.

Kirby stopped his car at the spot. and examined the area. A strange smell similar to ozone , was very evident.

" I was scared at first but thought it safe to get out of the car when the saucer flew off," he said.

" It was about 15 ft. in diameter and had six bluish lights on one side,".

He said he knew of two other Bordertown youths who had reported seeing a similar object on Saturday night 10 miles on the Adelaide side of Bordertown on the Duke's highway .

.....
We regret no report was made of this in the papers of the other youths sightings. or has there been any record sent in yet of this we have communicated with Mr. Kirby and await his reply .
.....

SIGHTINGS HERE & THERE

MOTORIST TELLS OF SKY OBJECT .

KATANNING WEST AUST . JAN 25th 1966 (West Australian)

A Katanning motorist today told how he watched a saucer-shaped object with bright rotating lights for more than an hour as it hovered over the Carrolup hill, 11 miles west of Katanning .

Lee Marshall (21) of Taylor St. . Katanning said he noticed a row of bright lights on the brow of a distant hill as he was driving towards Katanning along the Kojonup road at 12.30 a.m. last Thursday .

" From a distance they looked like the lights of a semi-trailer and I did not pay much attention , " he said.

" Then as I drove over the crest of a hill I was blinded by a bright yellow light."

Mr Marshall said he stopped his car and turned out the lights, and saw a big object hovering over the hill half a mile away .

" I watched, unable to move, for nearly 1½ hours," he said. " Then the lights appeared to become brighter and the object soared off towards Katanning at a terrific pace."

Mr Marshall said he arrived home just after 2 a.m. and waked his parents and his 19 year old brother . Ken

They all watched the object for about 15 minutes as it circled the town before heading south-east towards Nyabing .

oooooooooooooooooooo

FLOOD OF SIGHTINGS AROUND ADELAIDE.

Reports have simply flooded in ever since the beginning of the year of numerous sightings in and around or near to Adelaide. Some of these have proved to be conventional objects. such as satellites which have been passing over for some time now. also some aerial manoures caused quite a few to be mistaken for what people thought wer saucers. and it must be admitted on the surface had all the appearances of such. but we do not believe as some investigators do at just grabbing at a wild straw , running out and taping an interview, then wildly claiming such as a saucer without any attempt to check up with authorities if any aircraft. balloons . or other known facts could be the the explanation . So although we WANT very much to detail a saucer sighting we are not prepared to do so without honest checking. wild emotion is the worst type of investigation needed. and regretablely there are some who with loud publicity and high sounding titles . conduct their investigations in this haphazard way. Which does grant harm to our cause generally and certainly is making afool of the public.

One sighting of a confectuoner going to work at an early hour in the morning however seems pretty certain to be unexplained by ordinary sources.

He says. " I was going along in my car. toward Adelaide. when I noticed this large brilliant object just a little lower than the horizon and appearing to be " in front of the hills" Its strong brilliance is what struck him and then he noticed that it had started to move and rose within the space of 8 min to another level about 20 degrees higher . This was obvious that it was not as first thought probaly Venus or another Planet rising in the early

SIGHTINGS CONTINUED 2.

dawn. A matter which your Editor at first was prone to consider.

Having risen to this position it remained stationary for another two minutes and then disappeared altogether, and although the observer watched as he progressed on his way he could not see any further sign of it.

He said it was a little larger than the largest star and certainly much more brighter. He could see no formations on it. The weather was clear and only a small breeze was blowing. He had never seen a saucer before, but believed in the possibility of such. Date of sighting 8/2/66 Time 4.a.m.

.....

A week prior to this the Editor and his family were out on the lawn cooling off from the intense heat wave Adelaide has been suffering with. His daughter noticed an object coming in from the west. it was travelling at a terrific speed. She drew the attention of all the family present to it. It had a fast flashing light far too fast for an aircraft. which we often see overhead. Its speed alone ruled out any likely craft of earth for it traversed the arc of the sky from the western horizon to the zenith in a few seconds. Satellites were out of the question. one of these was observed later crossing the southern sky. but it took about 10 minutes or more to complete its crossing. Although we continued to gaze it just flicked out and no more was seen of this object. but hardly had we started to discuss it. when the phone started ringing and a whole family at a higher height of elevation reported seeing it and that it had reappeared again in the north where it was joined by other objects. then the whole of them sped away at great speed into the north. These people had scarcely rung off, when further calls came in from others describing the same incident. and these came from various tangents of compass points. Inquiries were made and no aircraft were up at that time although some did appear later on in the evening. No balloons. This is humorous. when considering the speed the wind would have had to travel to send a balloon along at that speed. We feel that as no other logical explanation can be found we are justified in calling it as one of " OURS " A SAUCER.

.....

Another report which has been handed into the Editor, but was not verified personally. but given to one of our staff. was the following case. This was on the same night as the above incident of the Editor and his family and their sighting.

The young man claims he was just out of Adelaide in a near by centre. which by the way holds a very good record for sightings at close range. quite a few of them occurring during the last year. He says he was looking into the distance when he felt a strange feeling creep over him, looking up just seven feet above him. he saw a saucer right over him. He claims he was panic stricken and could not move. then suddenly the craft swept up and away from him. He reported the matter to the police. and was subsequently visited by Air Force Security, so he says. he was told not to make any mention of it to the papers or to talk about it too much.

He refuses to have his name used. he certainly appears to be scared of any publicity. and when attempts were made to induce him to give further facts of size etc etc. he refused to discuss the matter any further.

On the whole this could be a case of wild imagination. it certainly cannot be one in which the author is seeking some publicity stunt. for his refusal

to talk indicates this to be out of the question.
Your Editor is inclined to believe his story on the grounds of the locale and due to the fact that very reliable witnesses have given accounts, some with several witnesses, of similar very close sightings in this very vicinity. Some of these folk have become members of our society since.
The last such case was a family in broad daylight who saw three huge saucers fly above their car as they were on their way home.
Other such near sightings seem to indicate that this area is one worth watching. There are two very significant landmarks in this area which may have a significance as to the frequency of saucer sightings. at the moment we feel it wise not to mention them. for we want to make some look out points in this area. and don't want to be bothered with nosy officials around.
We cannot dogmatise on this case and leave it to the reader to make his own evaluation ..

.....

We have learned since that an object similar to that described above was seen at a greater height a few miles further along the same coast line on the same night. This coming from an independent witness, and one who has no knowledge of the other case seems to add at least a little further indication of the veracity of the above story. However the unwillingness of the former to give helpful details makes it difficult to ascertain if the time factor etc. is in any way associated with the two sightings.
One thing is clear that people were seeing objects there that night.

.....

OBJECT IN SKY LIKE A METEORITE.

Sydney Morning Herald. Dec. 29th 1965

Descriptions of the fiery object that crashed near Eden on Sunday were consistent with those of meteorite sightings, the Curator of Minerals at the Australian Museum, Mr R.O. Chalmers, said last night.

He said the object's "green Flash", when it hit the ground, and flaming tail were similar to other descriptions of verified meteorite observations.

Mr. Chalmers said the description was convincing enough for him to make inquiries with the police near Eden about the object.

He said he had asked Pambula and Merimbula police to save any strange metals or rocks they find.

THREE MEN SAW IT.

The object was seen by three Melbourne men driving north on the Prince's Highway, about five miles north of Eden, at about 1.45 a.m. on Sunday. They told constable G. Rouney, of Merimbula, they saw a flaming object that skimmed low over the trees setting fire to them and exploding into the ground with a flash.

Constable Rouney said last night he had searched for 1½ hours near Jigamy Creek early yesterday, where the object was supposed to have fallen, but found nothing.

He said that another Eden resident interested in the sighting Mr J. Halloraan had searched for about four hours in the afternoon but without success.

.....

We feel the above report is more inclined to be that as claimed by the Curator i.e. that of a Meteorite or a bit of space metal. rather than a saucer. ED.

SIGHTINGS HERE AND THERE CONT. (4)

MYSTERY LIGHT

Daily Telegraph. Sydney. March 9th 1966

Newcastle. Tues. Residnets reported seeing a mysterious light very bright hovering over Newcastle harbor early this morning.

The light appeared at about 2.30 a.m.

Eyewitnesses said it was glowing and disc-shaped.

It was visible for about 10 minutes and then moved off at high speed over the B.H.P. steel works.

A spokesman for the Williamtown RAAF base said the object could have been a weather balloon.

.....

Comments. Comparing this with the account of the meteorite falling on recent page one could hardly claim this is the same class of report. further we did not know that weather balloons hovered for 10 minutes and then decide to move off at high speed. . surely whatever it was the RAAF spokesmans statement can hardly be expected to be accepted by logical analysis.

Frankly one gets a bit fed up of these punk answers to these myserious lights and objects. and one can hardly be blamed for thinking the mentality of these " spokesmen" from time to time must be on a very low par. or else they must be prepared to put such statements forth believing us and the general public to be as stupid as they themselves , far better not to make a statement than to submit one which only goes to prove one unworthy of themselves and and definate insult to public intelligence.

.....

DID F.S. CAUSE THE N.Y. BLACK OUT. ?. (cont from Page 12.)

Now it is quite apparent from all this evidence, that whatever caused this black out has given them quite a head ache, and certainly caught them with their pants down as they say so often in the American lingo.

Above all no admission will be made from official sources as to how much they know or what they suspect caused it. so we are at liberty to fit the jig saw pieces together ourselves and try to find the whole picture. This we will never be able to do. but our own intelligence and the good common sense to keep our feet on the ground and not be carried away with emotional outbursts, even if we are suacer researchers. compells us to weigh ALL the facts together and my judgement from all that I know is that this whole thing was a very much earth made affair and one which I believe and you have been told WILL BE REPEATED perhaps on a much larger scale next time. BUT PLEASE DON'T PLACE THE BLAME ON THOSE FRIENDLY AND PROVEN FRIENDS FROM CUTER SPACE. let's get the mud out of our eyes and WAKE UP. we are fighting a world war whother we admit or not of two great forces and its high time we pulled our heads out of the propaganda slush and took into account all that is going on around us.

Our enemies have in their possession drastic weapons of the most highly technical nature, and actually we are being sold out along the line by higher ups who are engineering for our defeat . I repeat as so often before the Space people are here to help us. despite what others may say . and when or IF they want to cause a blackout, they wont be toying around with a " fireball" and their weapons will be for the defence of the UNiversal Law of God. Not the laws of man or the United Nations. but those which concur with the GREAT DIVINE PLAN set out in the GREAT BLUE PRINT for the REDEMPTION OF WHO BELONG TO THAT PLAN and finally the ultimate Salvation of ALL.

Book Review

" FLYING SAUCERS OVER AUSTRALIA "
BY. JAMES HOLLEDGE.

This little cheaply produced edition (5/- now 50 cents) Australian. of the Flying Saucer story of events and incidents over Australia is indeed a very fine coverage. and certainly a very handy text book to have for any student or beginner in this subject .

Mr. Holledge who is completely unknown to us. we suspect him to be a newspaper reporter or under a nonde-plume. and despite his anonymity he is to congratulate for placing into the hands of the public a very fine gathering of the best evidence of the saucer events in Australia.

Some of his facts however as to the forming of groups etc. in the earlier period are a little askew. but we cannot blame him. for undoubtedly he has gathered this information from those who wanted the story told that way, in any case it does not make much difference except that the the proper credits of this period are not fully told. hence the absence of the whole facts causes a little distortion. but. the main cause of the story is to relate the incidents as they happened of the saucers. and therefor the personalities are but a background to the main theme.

We strongly recommend this to anyone who wants a very good book on the Australian story . and copies of same can be secured from this H.Q. address by mailing 50 cents plus postage approx. an extra 10 cents. for overseas. surface mailing .

Congratulations Mr. Holledge we would like more of such .

FLYING SAUCERS THROUGH THE AGES.

PRICE 21/- Aust . PRICE APPROX 2 dol 75 to 3 dol.

PUBLISHED BY NEVILLE SPEARMAN LTD.

We were so impressed by this book that we feel it merits a little more than usual commentary. Its Author. Paul Thomas whose real name is Paul Msiraki and who is a composer also living in the U.S.A. has undoubtedly gone to a lot of bother in his research to find the evidence he presents in this very fine book.

The book itself is translated from the French by none other than our well known UFO friend Gavin Gibbons who has made an excellent work of the translation and has particularly gone to much pains to avoid losing any of the sense of the authors original manuscript.

The book itself is as it says, a review of the evidence of the strange craft through the pages of historical evidence. and freely refers to many translations from the French Bibles especially the Jerusalem Bible. from which many new facets are presented of meanings which do not occur in our own English translations. and for this alone we are indebted to the author.

In his coverage he unavoidably has to refer to many incidents and also quotes some of which are well known to us and have been written upon before. but this does not detract from the great value of the book . for as in instance in his chapter on the Fatima incident. quite a few points were quite fresh to your Editor although he himself had studied this phenomena and written upon it several times. hence even if one finds a little repetition of previously known or read material . there is here and there a few more jig-saw pieces one can find to add to the complete puzzle picture.

Altogether In every chapter some of which presents much fresh thought and data, there is much for the serious student of the UFO. especially those who like the Editor find a strong connection between the coming of these visitors and those recorded in the Volume of the Sacred Law.

It is a valuable addition to any Saucer Library and we are indeed indebted to the publishers for letting us have one of the first copies.

The only fault we find is that we felt we wanted more when we finished the book and wished that the author had given us more lengthy chapters of some of his evidence much of which is obvious he has condensed down for general reading. But at least we can hope for a second to be done.

.....
THE RACE WHICH CAME FROM SPACE .

From "Psychological Commentaries." Vol 4. Page 1482. Maurice Nicoll 1955
Vincent Stuart. London .

" We came from a very high level, from outside the Solar System, and were plunged through the planetary worlds on to this earth and surrounded by flesh and blood. Then we became hypnotised by this life, and worldly things and self-love, and all the rest of it began to dominate us . "

Thus Adams Race is spoken of. and those that were here before he came, how true it is that we have lost the vision of our celestial spheres , but we are now awakening to our heritage. and mission.
